

Roofgrip

Roofgrip walkway mat is ideal for providing safe access on single ply flat roof systems.

The 14mm height of the matting provides permanent slip resistance - even in areas where water may pool.

Impervious to all weather conditions the matting is compatible with all roof systems (TPO/PVC/EPDM) as it is not adhered or bonded to the membrane.

Available in black or grey - widths 610-914mm and 220mm x 10mt long.

Please contact our sales office for price enquiries.
